

Job Title: Product Development Chemist, WOVEN BUSINESS UNIT

Precision Fabrics Group manufactures, markets and sells value-added products and services to selected, highly specified markets. Our high-performance products play a key role in several diverse markets, which demand engineered, finished fabrics. The common thread among these markets is the technical nature of their requirements.

Woven Business Unit: Precision Fabrics' Woven Division is built on vertical integration. We handle everything from weaving through dyeing and finishing. Precision Fabrics uses both sophisticated weaving of fine filament fabric and unique chemistries to create custom fabrics that meet a broad range of strict criteria for a variety of value-added products.

Job Summary: Support product and business development activities in our industrial fabrics business unit located in Greensboro, NC. Relocation assistance available.

Essential Job Capabilities of Successful Candidate:

- BS in Textile Science.
- Strong background and capabilities to develop products and new businesses for highly technical applications.
- Knowledge of woven textile yarns, fabrics and manufacturing processes, including fabric finishing.
- At a minimum, basic understanding of composite structures, polymeric and neoprene resins, manufacturing techniques, and technology trends in the use of coated and laminated structures.
- Knowledge of aerospace, military, and industrial fabrics businesses.
- Experience and understanding of ISO quality systems.
- Strong communication skills in both technical and business settings.
- Background in polymer science is a plus.

Essential Job Functions:

- Develop new products and grow sales. Identify, research, and evaluate new market opportunities.
- Carry out successful product development strategies in your area of responsibility. Create new-product marketing tools and assets, and train Product Managers in their use.
- Effectively manage sample inventories. Work with Product Managers to meet inventory goals.
- Provide technical support to customers, Product Managers, and PFG's manufacturing staff.
- Provide leadership and direction for R&D activities to your business team, the Woven R&D team, and manufacturing.
- Develop new processes for woven products, particularly as they relate to cost reduction and process improvements.
- Maintain good relations and communications with other PFG entities, including customer service, quality control, financial, manufacturing, planning, product development, distributors, and suppliers.
- Work with PFG quality control and testing managers to establish product and process specifications for new products and product upgrades.
- Follow safe procedures and work practices. Emphasize good laboratory housekeeping.
- Meet sales and margins for new products as set forth in the Corporate Annual Cash Flow Plan.

Precision Fabrics Group provides a progressive, innovative work environment. We offer competitive salaries with excellent benefits including: medical, dental, vision, 401(k) plan with company match, on-site wellness clinics, Employee Assistance Programs, tuition aid, and much more!
